Development portfolio further reduced

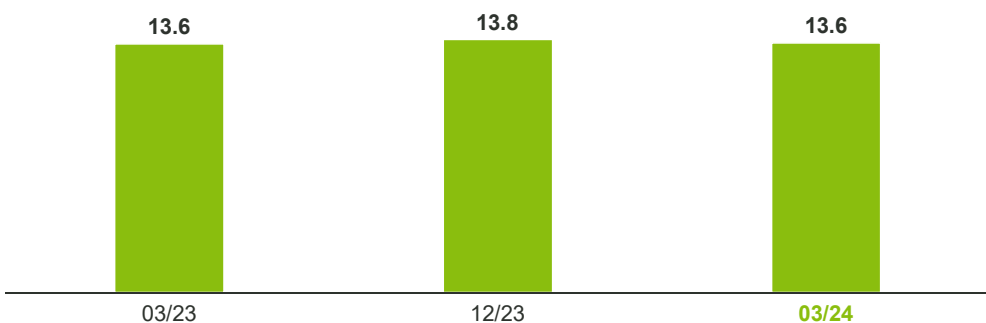

- **Portfolio** reduced by € 0.2 bn in Q1/24 – significantly **reduced** since 2019 (12/19: € 4.7 bn, 03/24: € 3.0 bn)
- **Senior lending only**
 - No exposure in unsecured/subordinated instruments
 - Cooperation only with selective and well **experienced large developers** – 40 developers for 60 projects
 - Focus on **office, residential and logistics** in major urban locations (very good locations) in Germany (only big 7) and Europe
- 2/3 in **land and finishing phase**
 - Therefore, no or only little immediate construction risk
 - ~75% of loans in construction and finishing phase **already finished or to be finished in 2024**
 - Risk management **focus on loans in construction phase**
- **Development NPLs** of € 418 mn with coverage ratio of ~15% via existing stage 3 LLPs of € 64 mn – 2024: 1 new case (€ 26 mn, land phase, no LLP)
 - Only German loans

RISK COSTS

Net income from risk provisioning € mn (IFRS)

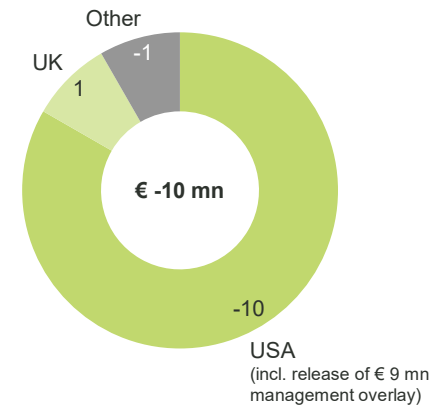

Challenging market environment reflected in credit risk and interest rate changes

- **Stage 1&2:** € -10 mn net additions still dominated by US – credit risk changes (€ -15 mn) and macroeconomic impact from interest rate rises (€ -4 mn) partly compensated by release of management overlay (€ +9 mn)
- **Stage 3:** € -37 mn net additions driven by US office and German development

1. Incl. provisions in off balance sheet lending business 2. Recoveries from written-off financial assets

Risk provisioning on elevated level, but significantly lower vs. Q4/23, as expected

FUNDING AND LIQUIDITY

Capital market funding needs for 2024 largely covered

- Further growth of **Retail deposits**
 - Strong reaction function on basis of broadened cooperations (ytd-growth € 1.5 bn)
 - Current volume of € 8.1 bn (04/24) well exceeds needs
- No need to issue **Senior Unsecured benchmark** in 2024
- **Secured** funding markets open at manageable cost – € 0.9 bn Pfandbriefe issued year-to-date; limited funding plans for remainder of 2024

Strong liquidity position further improved

- **€ >6 bn liquidity position** further increased – sufficient liquidity far beyond internal stress horizon (i.e. six times the regulatory requirements)

 - **Interest rate increase** in 03/24 by ~50 bps (for term deposits ≥ 2Y) with strong inflow
 - **Further rate reduction** in 05/24 by a total of ~ 100 bps in two steps for all term deposits and call money

FUNDING

Own Funds and Eligible Liabilities exceed regulatory requirements

€ bn

- Buffer for Senior Preferred (SP) investors due to high volume of capital instruments and Senior Non-Preferred (SNP) liabilities
- Existing Senior Non-Preferred liabilities with long remaining terms
- SP currently predominant senior product, but SNP to remain a key element of pbb's funding strategy
- Regulatory requirements (SREP, MREL etc.) are met

1. After confirmation of the 2023 financial statements 2. In addition to the regulatory requirements, pbb has set itself an ambition level of 8% TLOF with 100% subordination (i.e. own funds and senior non-preferred). As of 31 March 2024, MREL-eligible positions amounted to ~11.7% TLOF (excluding the approved level of general pre-approvals)~ 30.7% RWA/~ 11.7% leverage exposure 3. MREL-eligible Senior Non-Preferred Debt > 1Y according to legal maturities; without prior approval volumes for early termination of investments 4. Valuation review process (simplified)

ECONOMIC OUTLOOK

Base case: modest economic growth outlook

GDP growth picks up moderately in Europe

Inflation on track to return to 2% target by 2026

ECB will be cutting rates soon while the Fed remains patient

- In 2024 and 2025, pbb expects **GDP growth in Continental Europe** by ~0.8% and ~1.5%, while the UK is expected to grow again by ~0.5% this year, and ~1.3% in 2025. **US GDP** is expected to expand solidly over the next two years.
- **Inflation** developments are key for this year's outlook. Market consensus and pbb expect that the **ECB will begin lowering interest rates in mid-2024** while amid inflation on track to return to the 2% target while the **Fed is likely to move only** once it has gained **enough confidence that the prior inflation downward trend resumes**.
- This interest rate development in Europe and the US is expected to **stabilise the real estate market**.
- **The second quarter 2024 should remain challenging**. pbb expects to see **some further valuation corrections for US office properties**, but lower than 2023.
- Due to the different market structures, pbb **does not expect the same extent of distortions** in Europe as in the US.
- In Europe, the **"flight to quality" trend is expected to remain intact** but encounters lower vacancy rates than in the US.
- In Europe, office space **demand for prime properties in core inner-city locations is expected to continue to be strong**, especially when ESG standards are high.

| Office € 16.9 bn (51%) | | <ul style="list-style-type: none"> Net absorption has recovered compare to Covid, but is still relatively weak as a result of both the economic cycle, longer efficiency trends, and the impact of homeworking. Discussions about new concepts of work are ongoing. Employees prefer flexible working models and therefore office presence declines. Demand for office space is reduced accordingly. Demand is currently focused on modern, flexible and ESG-compliant properties in prime locations. Office space in secondary locations is still not sought after. Employment forecast is expected to be stable or even slightly positive. Together with a declining pipeline, this is leading to a slight increase in vacancies, but not to the extent of previous crises. As interest rates and inflation peaked, a further decline in prices is only expected to a limited extent, concentrating mainly on older properties in secondary locations. | <ul style="list-style-type: none"> Cooling of tenant market due to overall economic situation and shift of demand towards modern, green, centrally located properties leads to reletting/extension risks with pressure on rental level on secondary/older buildings. Good locations expected to remain competitive and "Green" having become a very core element in competition. Increased interest level in combination with competitive disadvantage for B-properties/B-locations has increased pressure on value in particular for these properties. Some former A-locations have, due to structural changes, downgraded to B-locations. Structural changes, cooled letting market and increased interest level have put pressure on cash flow for, in particular, class-B-properties. | <ul style="list-style-type: none"> Focus on good locations in main European and US urban locations. Avg. LTV of 58%¹ provides good buffer and supports commitment of investors/sponsors. Well diversified portfolio with focus in Germany, main cities in the US (e.g. New York, Boston, Washington) and France (almost completely Paris/Isle de France region). Detailed analysis of "green profile" of properties including associated risk conducted in new business and on occasions of (annual) credit reports transactions. |
| Residential € 5.7 bn (17%) | | <ul style="list-style-type: none"> The market of owner-occupied properties is expected to recover slowly as inflation declines and central banks will probably cut interest rates. Particular in Europe. Increased interest rates also had a negative impact on multifamily properties. Multipliers dropped significantly. Rising rents mitigated the effect to some extent. 2024 is expected to have different dynamics. First of all ESG-compliant properties are expected to be sought after. Regulations in the rental sector expected to impede NOI increase. | <ul style="list-style-type: none"> Increased interest level puts pressure on value, however still more moderate than in other (sub-) asset classes. Cash flow under pressure from many reasons: interest rates, energy costs, investment requirements - partially counterbalanced by increasing rents. In particular, capital-market oriented investors often with challenging refinancing situations. Transaction Market in Germany for portfolios gaining momentum again. | <ul style="list-style-type: none"> Portfolio volume of € 5.7 bn with avg. LTV of 48%¹ provides good buffer and supports commitment of investors/sponsors. Well diversified portfolio with strong focus on Germany. |
| Logistics € 5.3 bn (16%) | | <ul style="list-style-type: none"> The logistics sector benefits from a stronger focus on e-commerce but also from the need for more resilient supply chains in the industry sector. This in turn leads to rental growth in most market types, but focused on key cities where supply is low. The significant drop in values was yield driven, while rental growth is partially mitigating the decline. Since demand for logistics space is typically strongly correlated with economic activity and GDP current economic uncertainties pose a potential threat. Sought after investment class. | <ul style="list-style-type: none"> Monoline logistics centres depending on particular clients seen sceptical. Due to partially overheated prices, market correction on investment side seen. Rents still stable/partially further increasing. | <ul style="list-style-type: none"> Strategic approach; expert team since 2014; share increase since 2013 from 8% to 16%. Focus on locations: good infrastructure, connection to a variety of different transportation routes. Avg. LTV of 53%¹ provides good buffer and supports commitment of investors / sponsors. Well diversified portfolio. High quality of sponsors. |

 - Secured funding is ahead of plan
 - Markets open for public issues and private placements – € 100 mn tap in April (of Mortgage Pfandbrief successfully issued in January) at almost unchanged conditions
 - Limited funding plans for 2024 given pre-funding, limited balance sheet needs and broad toolbox for collateralised funding
 - 7 Pfandbrief Benchmarks in 2023 and 2024 year-to-date (4 EUR Benchmarks, 1 USD Benchmark, 1 GBP and 1 SEK) with average duration of 3 years matching pbb's asset duration
- Unsecured wholesale** largely replaced by stable and competitive retail deposits
 - One Senior Unsecured benchmark in early 2023
 - No Senior Unsecured benchmark needed in 2024
