Overall positive trend is emerging, investment volumes recover in Q2

European Prime Rents (2007=100; LHS) and Prime Yields (RHS)²

- European and US CRE investment volumes showing signs of recovery in Q2
 - Quarterly US figures were 14% above the pre-pandemic
 - First figures for Q2 suggest positive trend also for Europe

Europe:

- Decreasing market values so far focused on retail and hotel sectors
- Office yields continue to compress over the short to medium term, but on the back of relatively low volumes
- **UK office** yields are expected to be stable whereas retail yields are not expected to stabilize before 2022
- **Logistic** and **residential** assets are stable so far or see even increasing prices

Germany:

- Office prime yields are expected to see a continued but very modest inward yield shift driven by continued low interest rates despite an increase in vacancy
- Deal activity and investor sentiment focus on logistics, residential and food-based and big box retail assets
- Yields expected to increase, most notably for shopping centres

USA:

- Overall still commercial property price growth
- Weaker trends for the CBD office and retail sectors. counteracted by strength in the industrial and apartment sectors
- Yields for **office** properties are expected to increase

Future structural challenges – "Green" as positive differentiating factor

- Current crisis (COVID-19) different from last crisis (GFC) no cyclical downturn of CRE market prices and subsequent upwards adjustment;
 pandemic accelerates structural changes in real estate markets and their subsegments
 - New space concepts (Hygiene standards / social distancing)
 - Changing working environment (Working from Home / reduced space requirement)
 - Change in shopping behavior (Online-Shopping / new shopping & leisure concepts)
- High liquidity and investment pressure among investors still lead to high demand, with focus on Prime ("flight " to prime properties)
- Long term resilience of property values comes into focus "Green" as decisive positive factor reinforces "flight to prime"

- Future market development will be increasingly determined by "Green" buildings"
 - ESG conformity is becoming increasingly important
 - o Legal / regulatory requirements
 - o Social change / consciousness
 - First indications in the real estate market can already be observed
 - Better 'lettability' of ESG-conform properties (time, rental income)
 - Positive effect on stability of property value vs. "brown" real estate

- High attention of pbb on adaptation to structural challenges and contributing to climate protection
 - pbb Green Bond Concept implemented
 - pbb Green Loan Concept in finalization
- Property investors expected to increasingly incorporate
 ESG/Green factors into business plans
- > "Green" becomes the new standard for more stable demand and resilience of property value

 € 38 mn in place as subsequent effects from COVID-19
 pandemic expected with delay in H2/21
 - No relief measures applied since inception

Key drivers Q2/H1 2021

REF

- Financial segment performance benefitted from increased NII and lower risk provisioning y-o-y
- NII up y-o-y supported by lower refinancing costs incl. TLTRO and floor income
- Net income from realisations driven by higher prepayment fees
- Risk provisioning down y-o-y –additions in stage 1&2 due to individual deteriorations of PDs and high new business and in stage 3 mainly for revaluations of already provisioned UK shopping centre
- GAE up y-o-y, incl. higher project costs
- Financing volume stable y-o-y

PIF

- Financial segment performance supported by allocation effects
- Operating income down y-o-y, mainly affected by a slight decrease in net interest income; previous year benefited from net income from realisations
- Financing volume down due to maturities

Value Portfolio

- Financial segment performance supported by allocation effects
- Last year, financial **segment performance**was mainly affected by credit spread
 driven **valuation** effects related to COVID19 pandemic
- Financing volume further down in line with strategy due to maturities

Recovery of business hotels will focus first on central locations, fringe locations expected to be late in recovery, too. Shortage of qualified personnel in parts of the industry 	 Selective approach and strict adherence to conservative underwriting standards in particular during the hot phase of hotel investment market in 2018/19 resulting in a relatively small portfolio volume of € 1.3 bn Focus on prime location secures base value of properties Conservative risk positioning: avg.
