#### HIGHLIGHTS Q3/9M 2023

# pbb increases LLPs and is fully on track to deliver on 2026 targets

pbb adjusts PBT full-year guidance for 2023 to € 90-110 mn due to increased risk provisioning and substantial business investments

In reaction to the **ongoing weak CRE markets** (esp. in the US), pbb follows its risk conservative approach and increases **LLPs to** € -104 mn¹ for 9M/23 (9M/22: € -38 mn) – full-year guidance already anticipates a further noticeable Q4 addition to LLPs (incl. potential management overlay) caused by still dynamic market situation

Given its sound financial strength, pbb is able to deliver a significant PBT of € 91 mn for 9M/23 – despite increased risk costs and substantial expenses to deliver on the strategic agenda 2026

In specifying the Basel IV orientation, pbb intends to move to the so-called Foundation Internal Ratings-based Approach (F-IRBA) after implementation of Basel IV (~2025) – **after a transition period, CET1 ratio expected at ~15%** (09/23: 15.2%)

Taking into account the challenging situation on the real estate markets, **pbb assumes that unlike in previous years a special dividend will not be distributed**. However, **the overall dividend proposal remains subject to the conditions of pbb's dividend policy** and will be decided upon and communicated together with our full year results 2023.

#### pbb is fully on track to deliver on 2026 targets:

- Increasing NII+NCI (+20% q-o-q)
- Portfolio growth (€ +1.2 bn ytd) with margin uplift (gross new business margin 9M/23: +30bp vs. FY 2022)
- Strong retail deposit growth (€ +1.5 bn ytd)
- Significant cost cutting expected to deliver from 2024 onwards (back to 2022 level in 2026)

- Net interest, fee and commission income only slightly down y-o-y despite loss of TLTRO benefit and floor income, driven by REF portfolio growth, margin uplift, matured hedging instruments related to the TLTRO III and supported by one-offs (final loan extensions, payment of past due interest)
- Fair value measurement slightly positive previous year mainly supported by credit risk and funding cost induced valuation components
- Net income from realisations benefitted from sales from non-core unit (i.e. optimisation PIF&VP) and liability buybacks in H1/23; prepayment fees low
- Net income from hedge accounting temporary fixing effects in a rising interest rate environment
- Net other operating income mainly driven by release of provisions for litigation costs in Q3/23
- Net income from risk provisioning significant increase in Q3/23 mainly driven by volatile US market
- General administrative expenses expectedly up in reflection of substantial expenses to deliver on strategic agenda 2026 ("2023 year of investments")
- Bank levy decreased target volume of European Deposit Protection Fund resulted in lower fee; fully booked in H1/23
- Net income from write-downs and write-ups on non-financial assets

   regular depreciations and extraordinary full depreciation of software of CAPVERIANT GmbH in Q2/23
- RoE and EpS taking into account AT1 coupon¹

#### RISK PROVISIONING

**Most challenging market environment**, driven by high interest rates, high inflation, several geopolitical and economic uncertainties as well as structural changes

US market more strongly impacted, affecting some individual loans

- Structural changes in locations and preferences (new/remote work, green/ESG) lead to a shift in appreciation of macro and micro locations (e.g. tenants are avoiding certain CBD areas)
- At time of origination, all US office properties financed by pbb were in A-locations now, ~5-10% are considered B-locations
- Structural changes have led to partially fast and steep value decreases in formerly prime locations, also driven by short refinancing cycles in the US going along with a faster and more significant increase in interest rates compared to Europe
- Cash investors are currently in a strong position as (re-)financing is scarce, as many banks pulled out of the market this results in significant discounts
- However, ~80%<sup>1</sup> of the market correction is assumed to have happened many ex-prime locations are likely to achieve prime status again in expected market recovery

Attractive opportunities for pbb to underwrite new business on corrected valuations at highly favorable margins

<sup>1.</sup> Applies for interest rate induced cyclical market correction, does not take into account structural dislocations in singular cases

# Market volatility reflected in increased risk provisioning

**Risk provisioning** significantly increased by € -83 mn in Q3/23 (9M/23: € -104 mn, 2022: € -44 mn), primarily driven by existing stage 3 US office loans

€ -95 mn additions in **stage 3** (9M/23: € -111 mn) resulting from a limited number of individual cases

- Primarily driven by existing stage 3 US office loans mainly derived from a decrease in expected market values based on low bids of comparable assets in a very weak market with opportunistic investors only
- Only a few new cases with moderate LLPs in Q3/23

€ +12 mn release of **stage 1&2** in Q3/23 (9M/23: € +7 mn) – full release of **management overlay** (€ +28 mn) as anticipated uncertainty factors materialized and now reflected in risk models

#### **RISK PROVISIONING**

# Increase in stage 3 loss allowances reflecting market volatility, esp. in US market

Note: Figures may not add up due to rounding

#### NPL PORTFOLIO

# Increase in NPL portfolio volume driven only by a few new cases, mainly in the US

#### Non-performing loans - property type

€ mn (EaD, Basel III)

#### **Total NPL portfolio**

- NPL increase of net € +241 mn reflects stressed market environment, esp. high volatility in certain locations/asset classes in the US
  - € +254 mn additions and € -13 mn releases (incl. EaD changes and FX)
  - 5 new cases with stage 3 LLPs of € -19 mn in Q3/23 thereof € -18 mn for 3
     US office loans
  - Further € -76 mn additions of stage 3 LLPs mostly for existing US office NPLs, mainly derived from a decrease in expected market values based on low bids of comparable assets in a very weak market with opportunistic investors only
- In total, 14 new NPL cases in 9M/23
  - 9 US loans (€ 465 mn), 5 European loans (€ 178 mn; France, Germany,
     Poland and UK) plus EaD changes and FX
  - Partially compensated by removal of 1 US office loan (€ 116 mn), 1 UK loan (€ 9 mn) and 3 German loans (€ 49 mn)

#### **US NPL portfolio**

- Individual situations developing in parts dynamically, e.g. ongoing negotiations on restructurings / sales process in complex bank consortiums
- In total, 12 US NPL loans (11 office loans and 1 retail loan) with stage 3 LLPs of € 109 mn (in addition, € 94 mn stage 1&2 LLPs allocated to US loans)
- Decline in property market values of Ø 41% in last 12 months value decrease adequately considered in risk provisioning

Note: Figures may not add up due to rounding 1. Non-Performing Exposure ratio = Non-performing loans and bonds / total portfolio (EaD); NPL ratio (EBA definition) 09/23: 3.6%; 12/22: 1.9%; 12/21: 1.4% (NPL ratio = gross carrying amount of non-performing loans and advances (incl. loans in forbearance cure-period) / total gross carrying amount of loans and advances)

Note: Figures may not add up due to rounding 1. Based on performing investment loans only

- Total US portfolio has been reviewed in 2023, all revaluations based on external appraisers
- Property value decrease in the last 12 months:
  - Performing loans: ~24% on average, resulting in an average LTV¹ of 60%
  - Non-performing loans: ~41% on average, value decrease adequately considered in risk provisioning
- In line with bank standard, pbb measures LTVs based on commitment:
  - Drawdowns are typically linked to investments into the financed property and thus tend to increase market value
  - If measured against outstanding, no performing loan would be above 100% LTV

#### **PORTFOLIO**

# Overall portfolio quality remains solid with avg. LTV of 52% despite recent valuation adjustments

30/09/2023: € 27.9bn (€ bn, commitments, Basel III, LTV not sliced)

- Overall portfolio quality remains solid with focus on prime properties in core inner-city locations and conservative risk parameters
- Continuous and intensive monitoring of the portfolio by real estate appraisers – total portfolio scanned with particular focus on US and Office
  - Further expected valuation adjustments for pbb's portfolio in Q4/23 and 2024 are taken into account in our model parameters for stage 1&2 LLPs:

US Office portfolio: Ø 10%

European Office portfolio: Ø 3%

Total Office portfolio: Ø 4%

Expected value adjustments are to be read against valuation adjustments of previous periods already accounted for / to be seen cumulative

#### CAPITAL

## pbb intends to move to F-IRBA – CET1 ratio expected at ~15% after Basel IV introduction

#### Q3/9M 2023

- Capital ratios down y-o-y due to increased RWA and decreased regulatory capital
  - RWA increase reflects new REF commitments, individual internal rating deteriorations and reclassifications, partially compensated by maturity and FX effects
  - Decrease in regulatory capital vs. 12/22 mainly resulting from EL shortfall and shorter remaining maturities of Tier 2 instruments; interim profit not included

#### Target landscape for risk models

- In specifying the Basel IV orientation, pbb intends to move to the so-called Foundation Internal Ratings-based Approach (F-IRBA) for the majority of the portfolio
  - Target landscape (largely F-IRBA) provides for expected CET 1 ratio of ~15% after implementation of Basel IV (~2025)
  - Until the new rules come into effect, standardized model parameters will be used, which may lead to a temporary reduction of the CET1 ratio
  - CET 1 ratio remains significantly above the current regulatory requirement of 9.31% even in transitional period
- Thus, pbb continues to follow its overall risk conservative approach, providing for more stable regulatory capital ratios in the future
- No effect on pbb's overall strategy as absolute capital, portfolio quality and default rates remain unchanged and thus pbb's overall risk capacity
- SREP requirements 2024 excl. anticipated additional buffer of 90 bp (CCyB + SyRB) Pillar 2-requirements increased by 0.50% to 3.00% vs. 2023:

CET 1 ratio: 8.69%Tier 1 ratio: 10.75%Own funds ratio: 13.50%
